DISCRETE MATHEMATICS
VOLUME 112, NUMBERS 1–3, 25 MARCH 1993

CONTENTS

J.D. Berman, E.W. Kiss, P. Pröhle and Á. Szendrei
The set of types of a finitely generated variety 1

C.-Y. Chao and Z. Chen
On uniquely 3-colorable graphs 21

C. Chen and J. Wang
Factors in graphs with odd-cycle property 29

M. Conder
Generating the Mathieu groups and associated Steiner systems 41

P. Damaschke
Paths in interval graphs and circular arc graphs 49

M.P. Delest and J.M. Fedou
Enumeration of skew Ferrers diagrams 65

G. Ding
Disjoint circuits on a Klein bottle and a theorem on posets 81

S. Gao and W. Wei
On non-Abelian group difference sets 93

A. Knopfmacher and J. Knopfmacher
Counting irreducible factors of polynomials over a finite field 103

L. Libkin
Direct product decompositions of lattices, closures and relation schemes 119

D. Lou and D.A. Holton
Lower bound of cyclic edge connectivity for *n*-extendability of regular graphs 139

T. Łuczak
The size of the largest hole in a random graph 151

K.T. Phelps and C.A. Rodger
Nesting partial Steiner triple systems with 2-regular leave graphs 165

A.G. Robinson and A.J. Goldman
The isolation game for regular graphs 173

J. Rodriguez and A. Satyanarayana
A generalized chromatic polynomial, acyclic orientations with prescribed sources and sinks, and network reliability 185

Z. Tuza
Multipartite Turán problem for connected graphs and hypergraphs 199

M. Wild
Cover preserving embedding of modular lattices into partition lattices 207

Communication

H. Chabanne and N. Sendrier
On the concatenated structures of a [49, 18, 12] binary abelian code 245

Notes

B.W. Brock
A new construction of circulant $GH(p^2; Z_p)$ 249

G. Chen
Hamiltonian graphs involving neighborhood intersections 253

P. Dolan and M. Halsey
Random edge domination 259

G.-G. Gao
On consecutive numbers of the same height in the Collatz problem 261

Z. Lengvárszky
Distributive sublattices and weakly independent subsets in modular lattices 269

F. Maffray
Antitwins in partitionable graphs 275

B. Mohar
7-critical graphs of bounded genus 279

R. Scapellato
A characterization of bipartite graphs associated with BIB-designs with $\lambda = 1$ 283

S. Sridharan
On the Berge's strong path partition conjecture 289

H. Zhou
Inequalities with respect to graph homomorphism 295

Author index to volume 112 299
